

## Forest of Arden Marriot Hotel and Country Club

## Drainage feasibility and design project Project Value | £1,500

**RMC Water** was selected to undertake a comprehensive feasibility study into pollution and flooding issues within the hotel's estate.

One of the reasons **RMC Water** was chosen was due to the professionalism of our people as the project scope included areas on the famous Arden Championship Golf Course.

Forest of Arden, A Marriott Hotel & Country Club, is one of the UK's most impressive golf destinations, featuring two top-class golf courses in the West Midlands - the Arden Course and Aylesford Course.

CCTV, electro location and dye tracing were undertaken to confirm the connectivity for mapping purposes.

Root causes were identified to a number of issues within the estates drainage networks.

**RMC Water** completed design and cost options, which included innovation products for the client to decide on the best cost benefit solutions to move forward with.

One of the reasons **RMC Water** was chosen was due to the professionalism of our people
